

# We are growing. Are you?

Ogone is looking for a **DATABASE ADMINISTRATOR SQL** m/f  
for our Brussels HQ

## YOUR JOB

Your main responsibility is to maintain and improve the Ogone databases (production and non production), to make sure that Ogone's data are compliant with our business requirements and to propose solutions/evolutions to improve this. You take the data availability, integrity, security & recoverability of Ogone's data as your personal objective.

After an internal training period about our products and services, you will be an Ogone DBA expert allowing you to:

- Administer our MS SQL Server database environments and monitor their health proactively to keep them in excellent shape
- Analyze, design and remodel our databases and the data models
- Analyze data queries and optimize them (pro- and reactively)
- Lead projects related to our databases with a focus on increasing performance, availability and scalability of our database infrastructure.
- Monitor security and system events and take appropriate action in case of incident including taking part in the off-hours monitoring rotation of our environment
- Support other internal teams for data related matters and assist them in optimizing the application's database usage
- Provide reporting (daily/monthly/yearly) on our database usage and are able to perform proactive trend-analysis and growth forecasting based on indicators given by your management

- 
- Take an important role in the new cross-departmental performance/release unit where you will work together with our developers to improve and control the performance of the application and databases

## YOUR QUALITIES

For this challenging IT function, we need a talented and passionate SQL expert with very good communication and reporting skills.

- Higher education in IT/Engineering or equivalent by experience
- Very good bilingual (French & English), knowledge of Dutch and German are assets
- Mature and accountable
- At least 5 years of experience with at least 3 years in management of MS SQL server in a mission critical environment
- Security minded and, ideally, already involved in the implementation of security standards
- Experience with storage fundamentals (SAN), SQL2008 (Rolling updates, resource governor, peering,...), knowledge of Database mirroring or stretch-clustering would be considered as an asset
- Index management, update statistics and other jobs hold no secrets for you
- Strong analytical skills, problem solving ability and stress resistant capability
- Thorough, methodical and business minded

## WHY OZONE?

You work for a fast-growing major player in electronic payments and have responsibilities that challenge your skills. You handle complex products at international level every day. In our open corporate culture you receive regular feedback and have freedom to achieve your goals and further your career.

Your performance and experience attract a competitive salary with benefits.
