

We are growing. Are you?

Ogone is looking for a **PRODUCT MANAGER** m/f
for our Brussels HQ

YOUR JOB

Reporting to the Head of Product Management, you are a member of the Product Management Team. Your mission is to drive the revenues for your product by managing the entire product life cycle: development of the product strategy, definition and delivery of new features and product follow up.

After an internal training period, you will be an expert in Ogone products and services, allowing you to “own” your product:

- Maximize the revenues of your product(s)
- Document your product strategy in a roadmap validated by the stakeholders
- Challenge and align the ideas against the strategy, pricing, markets and potential customers
- Drive the implementation of new features and feature improvements
- Bring high level requirements for feasibility assessment purposes
- Create and defend the business cases
- Prepare detailed product requirements
- Manage product launches
- Drive and support sales in selling your product: provide material, tools and reporting, participate in customer meetings
- Develop a pragmatic product management dashboard to track and steer the success

Because of your focus, business insight and technical skills, your products will be better thought through. Once the identification/qualification is performed and the project approved, the project execution will be led by a Project Manager.

You will set the scene for the future and act as a role model: you must not only be able to do the job but also to “walk the talk”, give the example and inspire others, especially because the role interacts with virtually all divisions and at all levels in the company.

YOUR QUALITIES

For this challenging function, we need a talented individual with excellent analytical and personal skills. As candidate you match following requirements:

- University degree or equivalent through experience: technical degree with proven marketing skills or non technical degree with strong technical affinity
- Experience in B2B market management, product and solution management
- Successful and significant track record in product management; possibly in IT, PSP, telco or finance with high professional standards. Experience in go 2 market is a plus
- Very good knowledge of English is mandatory. French, Dutch and German are assets
- Good helicopter view (developing a vision) yet hands-on when required (delivering results and solving problems)
- Strong analytical skills
- Excellent and to the point communicator
- Capacity to enthuse cross functional teams
- Able to work in a fast paced environment and market
- Experience within an acquirer, a bank, a PSP, is a plus

WHY OZONE?

You work with complex products in a host of different sectors at the national and international level. You grow because your job challenges your skills every day. Your colleagues are all totally committed: there’s a reason why we are growing all the time. In our open corporate culture you have freedom to achieve your goals and further your career.

Set your sights on becoming Product Manager? We welcome your drive. Your responsibilities and experience attract a competitive salary with benefits and training opportunities.
